Professional Profile

Graduate Software Developer with Distinctions and practical experience building mobile, desktop, web, and productivity applications. Strong foundation in C#, Kotlin, Java, SQL, and Object-Oriented Programming, specializing in Backend and Mobile Development.

Experienced in developing Android applications using Kotlin, Firebase, and Room Database, alongside backend and full-stack solutions using .NET technologies. Passionate about building software that solves real-world problems and continuously expanding expertise in ASP.NET Core, SQL Server, cloud technologies, and modern software engineering practices.

I build software solutions specializing in Backend and Mobile Development while continuing to learn from experienced engineering teams.
