Professional Profile

Software Developer with practical experience designing and building software solutions across mobile, web, desktop, and productivity platforms. Graduated with Distinctions in Information Technology in Software Development and possesses a strong foundation in Object-Oriented Programming, Backend Development, and Mobile Application Development.

Experienced in developing Android applications using Kotlin, Firebase, and Room Database alongside backend and full-stack solutions using C# and .NET technologies. Passionate about solving real-world problems through modern software engineering practices and building reliable, maintainable, and scalable software solutions.

EDUCATION

Diploma in Information Technology (Software Development)

IIE Rosebank College | 2023 – 2025

Achievements

- Graduated with Distinctions.
- Successfully completed Work Integrated Learning (WIL).
- Specialized in Software Development.
- Built multiple software solutions across mobile, web, and desktop platforms.
- Participated in Agile team projects using Azure DevOps.

TECHNICAL SKILLS

Programming Languages: C#, Kotlin, Java, JavaScript, PHP, SQL, Python (Basic).

Frameworks & Technologies: .NET Framework, ASP.NET Core, Firebase, Supabase, Room Database.

Databases: MySQL, SQL Fundamentals and Database Design Principles

Development Tools: Visual Studio, Visual Studio Code, Android Studio, Git, GitHub, Azure DevOps, WordPress.

Software Development Practices: Object-Oriented Programming (OOP), Agile Methodologies, Problem Solving, Technical Documentation, Responsive Web Design, Team Collaboration, Client Requirement Analysis.

PROFESSIONAL EXPERIENCE

Time and Attendance Clerk

Northam Platinum – Eland Platinum Mine

January 2026 – Present

- Maintain and verify employee attendance records supporting payroll operations.
- Generate operational reports while ensuring data accuracy and confidentiality.
- Collaborate with supervisors and Human Resources departments to resolve discrepancies efficiently.
- Developed strong analytical, communication, problem-solving, and time management skills within a fast-paced operational environment.

SOFTWARE DEVELOPMENT EXPERIENCE

Academic, Personal and Client Projects (2023 – Present)

- Designed and developed software solutions across Mobile, Backend, Web, and Productivity platforms.
- Built Android applications utilizing Kotlin, Firebase, and Room Database technologies.
- Developed backend and full-stack applications using C#, .NET technologies, SQL, and modern software engineering principles.
- Collaborated within development teams utilizing Agile methodologies and Azure DevOps during Work Integrated Learning projects.
- Delivered client-focused website enhancements through WordPress development work for Fundani Tours, improving usability, accessibility, and business functionality.
- Produced technical documentation and enhancement reports while translating client requirements into practical software solutions.

Featured projects include: MOS, SmartSpend, Healthify, Fundani Tours, and my Software Developer Portfolio. Additional software projects are available within my portfolio and GitHub repositories.
